400 GR

Lemon blossom honey leaves a unique mark on the palate with its sweet and slightly sour notes. It is indispensable for breakfast tables with its intense aroma and light consistency. You can also turn it into a natural healing source by adding it to your

tea or hot water. This honey, which strengthens the immune system, gives energy and contributes to your health by removing toxins from the body, will impress you with its taste and health benefits.

# Thyme Honey

860 Gr

Thyme Honey brings the unique aroma of the thyme plant and natural healing to your tables. Blending the rich flower cover of the Taurus Mountains, where the thyme plant is abundant, this honey is one of the purest and most carefully processed products of nature. Thyme honey is obtained by the maturation of the nectar carefully collected by the bees from the flowers of the thyme plant, as a result of a natural process in the hives.

Thanks to its special production process, it reaches your tables without additives and preservatives. Combined with the original smell and unique aroma of the thyme plant, it offers an exquisite taste. Thyme Honey, which is also very valuable in terms of health, contains antioxidants and natural antibacterial properties. It strengthens the immune system, increases body resistance and helps protect you on cold winter days. It also supports the digestive system.

# Cedar Honey

860 Gr

Cedar Honey leaves an unforgettable taste on the palate with its unique taste and light amber color. The unique scent and unique aroma of cedar wood distinguishes this honey from others. It offers a perfect balance with its light and dense consistency, it is an indispensable taste of breakfast tables. You can also turn it into a healthy drink by adding

it to your tea or mixing it with hot water. Cedar Honey is a natural source of healing. Thanks to the vitamins, minerals and antioxidants in its content, it strengthens the immune system, gives energy and supports a healthy life by removing toxins from the body. It also helps maintain stomach health and balances the digestive system.

# Pine Honey

860 Gr

One of the carefully selected natural flavors of the Taurus Mountain Honey brand, 860 gr Pine Honey is obtained from the unique flora of pine trees, one of the richest and healing resources of nature. This honey, which is collected in the natural environment of bees with the effect of clean air and rich vegetation in the lush forests of the Taurus Mountains, is a pure and delicious natural product. Pine Honey attracts attention with its dark color and dense texture. It leaves an unfor-

gettable mark on the palate with its unique aroma and unique taste. In addition to being indispensable for breakfast tables, you can add it to your tea or hot water and turn it into a natural healing source. Pine Honey, which is very valuable for health, strengthens the immune system with its rich nutritional content, gives energy and supports the body. It also has antiseptic properties and it helps to relax their way.

# Quinoa Blend Honey

400 Gr

Quinoa mixture is produced with a mixture of honey, quinoa plant and natural honey. This honey, which is formed by the combination of the beneficial quinoa plant and the unique natural honey of the Taurus Mountains, is both a delicious and very useful product. You can find this product

only in Taurus Mountain Honey in the world. Quinoa blend honey has unique flavor notes based on the chemical structure of the quinoa flowers. It is possible to consume quinoa honey in different ways such as sweetening, spreading, marinating or sauce.

## Snap Lid Strained Flower Honey 400 Gr

Snap cap honey is a honey product presented in different packaging. It is easily available and useful thanks to its packaging. 100% naturally produced, this flower honey has energizing properties. The product weighs 400 grams and is rich in content. Taurus Mountain Honey brings you filtered flower honey to offer a different and nutritious flavor. Since it has a light and soft taste, it is

seen as an option especially for breakfast. It is also possible to use strained flower honey as a sweetener. Strained flower honey, which offers multiple uses, is preferred more than other types of honey. There are vitamins, minerals, proteins, enzymes and fibers in snap-cap strained flower honey. This is one of the reasons why it is preferred in terms of nutrition.

## Strained Carob Honey 400 Gr

Carob honey is a type of honey that consists of the extracts of carob trees. Since monoflora is a type of honey, it is produced from a single flower by maturing it by worker bees. Since it is produced from only a single flower, it has a dominant carob aroma. This type of honey is also called carob honey. It differs from other types of honey

with its colour, smell, consistency and taste. It is especially important that it contains rich calcium, vitamins and minerals. Thanks to the calcium it contains, it is known to help teeth and gum health. Carob honey, which has a dark color, has a fluid consistency. Therefore, it is possible to consume it by spreading on bread or as a sweetener.

## Filtered Black Cumin Honey 400 Gr

Nigella sativa honey is a different type of honey obtained from nigella sativa flower. It offers a different taste to gourmets with its unique taste. Since it is a rare type of honey, it is not produced in every region. The region where it is produced in Turkey is generally the Mediterranean Region. Black cumin honey, which is 100% naturally produced, does not contain preservatives and

sweeteners. After the black seed honey is harvested, it is filtered and rested. Afterwards, it is transferred to glass jars and brought to consumers with its 100% naturalness. Black cumin honey, which has a dark color, contains rich nutrients. Among these substances are high antioxidant, protein and flavonoid. Thanks to these ingredients, it is known to strengthen immunity.

## Strained Chestnut Honey 400 Gr

Chestnut honey is a type of honey that differs from other honeys with its colour, taste, smell and structure. This type of honey is produced from chestnut trees at certain times of the year. In particular, June is a period in which chestnut honey is produced. Since the chestnut tree is not found everywhere, the production of chestnut honey cannot take place everywhere. Our chestnut honey, which belongs to the Black

Sea region, is of a quality that you can rarely come across in the world. Chestnut honey is more viscous than other types of honey. It also has a unique taste and smell. Since it has a slightly bitter taste, it is distinguished from others with these features. Because of its taste, it is also called bitter honey among the people. The color of this honey type is also darker than other honey types.

## Strained Premium 240 Gr

Raw Honey is produced without heat treatment. Since it is produced in an area far from nature pollution, it can be consumed safely. This product, which is produced 100% naturally, does not lose its vitamin, protein and mineral values. Therefore, it is possible to take these nutritional values directly into the body when consumed. Raw Honey Premium has some positive effects. This honey, which is offered for sale as

soon as it comes out of the hive, has its own unique taste and smell. Compared to other honeys, the proline value is higher. Since it is a natural energy source, it provides activity throughout the day. This product, which is offered for sale with Taurus Mountain Honey quality, is also a natural source of antioxidants. In this respect, it is known to strengthen the immune system.

## Strained Raw Honey Plus 240 Gr

It is offered for sale as crystallized. Raw Honey differs from other types of honey in some ways. This type of honey does not undergo heat treatment above 45 degrees. At the same time, the filtration process, which does not lose pollen, vitamin and enzyme values, is not applied. The most important difference from other honeys is that it is offered to consumers in its purest form. Produced by Taurus Mountain Honey, this

type of honey is produced in the untouched high altitude springs of Mersin. Raw honey containing 1300 proline is produced by Taurus Mountain Honey to be presented to your tables with its nutritional content. 100% naturally produced strained raw honey can be consumed with peace of mind. This type of honey, which presents the taste and aroma of the Taurus Mountains to the tables, has a high nutritional value.

## Strained Çakşir Honey Plus 400 Gr

Çakşir honey is a type of honey produced from Çakşir grass. Since the nectar extract of each honey differs according to its type, the nectar of Çakşir honey is also the nectar grass. The Çakır plant, which is mostly seen in the Eastern Mediterranean region, is grown in cities such as Mersin, Osmaniye and Kahramanmaraş. Therefore, it is possible to come across the Çakır plant in the Taurus Mountains.

This plant, which is generally yellow in color, is 2 meters tall on average. The discovery of this plant, which has been used since Central Asia, dates back centuries. Today, it is known that honey is also produced from this plant. Çakşir does not grow in many places due to endemic vegetation. This shows that Çakşir honey is produced in certain regions, not everywhere. It has an aphrodisiac effect.

## Strained Lemon Honey 400 Gr

Lemon blossom honey has a unique flavor and smell. This type of honey consists of extracts collected from the flower of the lemon tree. Bees collect enzymes in the flowers that bloom on lemon trees in spring. Then they combine them with their own extracts to create lemon blossom honey. Lemon blossom honey is a

type of honey that has distinctive features among honey types. One of the distinguishing features of honey is that it is fluid and shiny in structure. This type of honey has a form close to liquid. These distinguishing features can be used to understand that lemon blossom honey is unique.

## Strained Cedar Honey 400 Gr

Cedar Honey is different from other types of honey in many ways. Its appearance, taste, smell and components are among the different properties of cedar honey. Cedar honey, which is not flower honey, is essentially a secretory honey. The secretion formed on the cedar tree is carried to the hives with the help of bees and a new type of honey is produced. Cedar honey, which is produced in limited quantities, is rarely found. For this rea-

son, it is not produced everywhere and at all times. The region where strained cedar honey is produced efficiently is the Mediterranean Region. Produced by Taurus Mountain Honey, this type of honey is obtained from the natural maquis vegetation of Mersin. Cedar honey obtained in hygienic and favorable environments has some distinctive features. The flavor of this type of honey, which has a unique aroma, is different from normal flower honeys.

## Strained Pine Honey 400 Gr

Pine honey is a type of honey produced by bees collecting nectar from pine tree flowers. Pine trees are found in Turkey, especially in the Aegean and Mediterranean regions. Nectar from pine trees is relatively low in sugar content compared to other types of flowers, so the resulting honey usually has a darker and stronger flavor than other types of honey.

Pine honey is considered a special kind of honey because it is not widely produced and can be difficult to find. The taste of pine honey is slightly resinous, pungent and distinctive. It also has a darker color than other types of honey. Our pine honey, which belongs to the Aegean Region region, is produced by natural methods with the assurance of Taurus Mountain Honey.

## Strained Thyme Honey 400 Gr

Thyme honey is typically light in color and has a strong, herbal aroma. The flavor is also quite strong and has a tangy flavor with some sweetness. It also has a normal fluidity in consistency. It is considered a monofloral honey because it is derived from the nectar of a single flower species, the thyme flower. Produced by Taurus Mountain Honey, this type of honey is produced naturally in untou-

ched highlands. In general, thyme honey is considered a unique and delicious honey that is perfect for adding sweetness and herbal flavor to a variety of dishes. This honey type, which is harvested in May and August, has 100% natural content. It is known that consuming a spoonful of natural thyme honey every morning before starting the day is also beneficial for body health.

## Filtered Flower Honey 480 Gr

Taurus with more than 2 thousand flowers and more than 20 endemic plants. Our flower honey, which is produced at an altitude of 2000 meters without being exposed to any pesticides or exhaust fumes in the Egricayir plateau of the mountains, welcomes you with its smell and taste.

it will take you to your childhood. You will not miss our flower honey, which you can feel the smell of dozens of flowers in a spoon, on your breakfast table. You will personally witness that there is honey that makes children love honey.

# Filtered Flower Honey

## 860 Gr

Flower Honey is a type of honey obtained from the nectar that worker bees take from flowers. Flower honey can be obtained from different flowers. This feature differs according to the climatic conditions and vegetation of the region where it is produced. This type of honey, which can be produced in almost every region, is produced in Mersin on the Taurus Mountain Honey. As the high altitude Taurus Mountains are covered with various flowers, unique and delicious

honey are produced. Flower honey, which is widely consumed today, has a normal honey fluidity and is yellow in color. This type of honey, which does not contain artificial sugar such as glucose and fructose, is presented with its naturalness. It can be consumed both as a sweetener and as a delicious food for breakfast. It is known that flower honey has a great effect on children, especially in developmental age.

# 03. HONEYCOMB

## Honeycomb

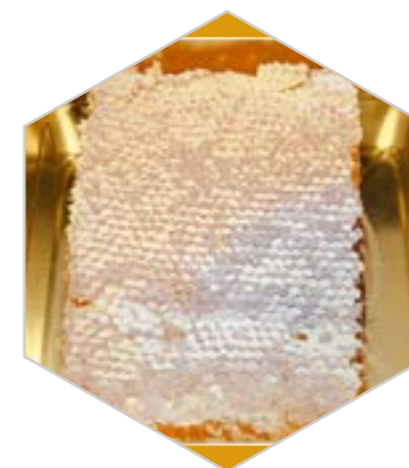

An engineering marvel, Honeycomb Honey was produced by expert bee engineers of the Taurus Mountains. Order the honey that comes to your table from the hive and has a story now!

HONEYCOMB - 450 GR

HONEYCOMB - 750 GR

HONEYCOMB - 1 KG

HONEYCOMB - 1,5 KG

# Honeycomb 450 Gr

Honeycomb appears as a hexagonal honeycomb. The honey type in question is produced by worker bees. Worker bees collect the sap they collect from plants in honeycombs made of beeswax. The plant extracts that the worker bees combine with their own enzymes form the comb honey. If the honey type in question is well preserved, it preserves its structure for years. At the

same time, this type of honey is said to be a strong storehouse of antioxidants. Taurus Mountain Honey brand brings comb honey from high springs to breakfast tables. Honeycomb contains royal jelly, propolis and pollen. These substances are present in honeycomb, albeit in very small amounts. And at the same time, this type of honey is known to be rich in nutritional value.

# Honeycomb 750 Gr

Honeycomb Honey, which is produced genuinely, becomes ready for consumption with its positive properties. In addition to being rich in B and C vitamins, it is also rich in iron, calcium, potassium, zinc and magnesium. With these aspects, it offers positive effects on human health. One of the most important differences of comb honey from other honeys is its consistency. While

other types of honey generally have a fluid structure, honeycomb honey is in solid form. Although it has a solid form, it can be consumed just like other liquid honeys. It is suitable for children and adults and can be consumed in certain portions every day. This type of honey, which is likely to crystallize, can be eaten after keeping it at room temperature. This product, which is a natural sweetener, can also be used in making desserts.

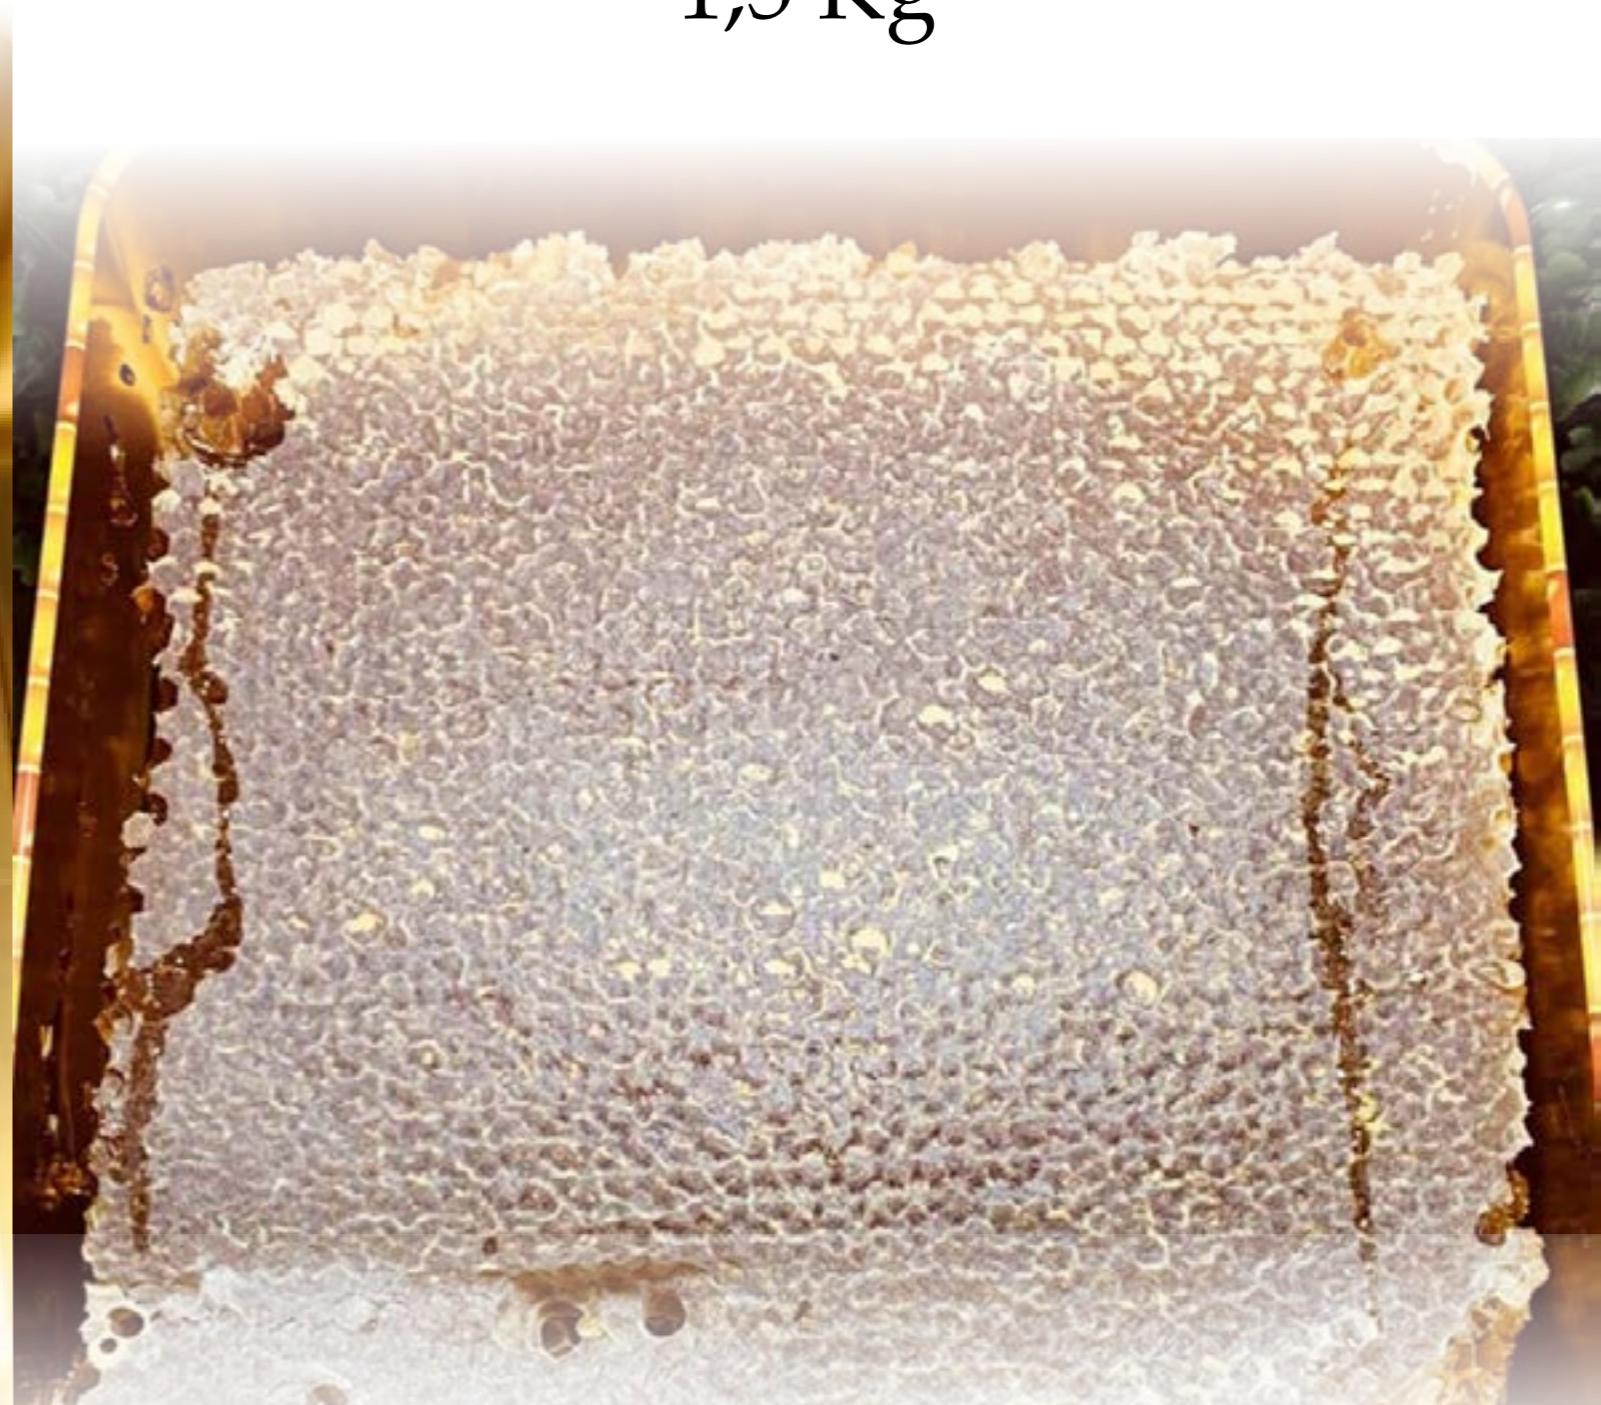

# Honeycomb 1 Kg

Comb honey is a type of honey that draws attention especially with its structure. Honeycomb honey is produced by the use of beeswax by worker bees. The most important difference from other honeys is that it is served to the table without straining. This is the most important feature of honeycomb honey. Thanks to its solid structure, it can be chewed in the mouth and offers a different honey form to honey gourmets. It begins to be produced by taking nec-

tar and liquid from flower essences. Afterwards, the worker bees are placed between the honeycombs using this nectar and its liquids beeswax. These honeycombs are also quite flawless and impressive in shape. All honeycombs in the form of hexagons are filled by bees in such a way that there is no space left. Worker bees are not limited to just filling honeycombs. At the same time, bees cover the honeycombs and protect the honey.

# Honeycomb 1,5 Kg

The first difference of 1.5 kg honey from other honeys is that it is produced in the form of honeycomb. This type of honey, which differs in appearance, taste and consistency, is produced 100% naturally by Taurus Mountain Honey. No artificial sugar is used while producing honeycomb. It contains only monosaccharides, which are natural sugars. There are

also disaccharides. Thus, honeycomb honey, which does not contain artificial sugars such as glucose or fructose, is presented with its natural content. Comb honey, a natural product of Taurus Mountain Honey, is produced in the Taurus Mountains, which are the high parts of Mersin. Therefore, there is no artificial activity.

# 04. KARAKOVAN *honey*

## Karakovan Honey

A factory without electricity. Our worker bees are so professional that they do this job blindfolded. Order the honeys with a story and we will bring you Karakovan Honey, produced by our expert bee friends, to your home.

KARAKOVAN BALI  
400 GR

KARAKOVAN BALI  
600 GR

KARAKOVAN BALI  
1,2 KG

## Karakovan Honey 400 Gr

Karakovan Honey is a 100% natural honey product. The production of the caravan begins when the bees fill the hive with beeswax. It has a very clear difference compared to other types of honey. This type of honey is produced in a beehive that does not see light. Since no intervention is made during its production, it is obtained in a completely natural way. Karakovan Honey 1.2 Kg, which is very rich

in vitamins and pollen, is preferred by people who are looking for natural honey today. Especially the fact that it is rich in B, C and K vitamins reveals the various effects of this honey. Karakovan honey, which is known to be good for circulation, digestion and immune system, is thought to be beneficial for hair, skin and eye health as well as body health. Therefore, there is a great demand for the product today.

# Karakovan Honey

## 600 Gr

Karakovan honey is among the most preferred honey types due to its natural structure. In addition, the production of this type of honey requires a lot of effort due to the purity of the honey. The fact that the worker bees produce both the honey and the comb themselves highlights the la-

bor in the type of honey. Taurus Mountain Honey brand delivers this type of honey with pure quality to all corners of Turkey. Worker bees collect the sap they collect in these logs and form a honeycomb. Poplar, linden, chestnut or hornbeam logs are generally used in this type of honey.

# Karakovan Honey

## 1,2 Kg

Karakovan Honey 1.2 Kg, which is very rich in vitamins and pollen, is preferred by people who are looking for natural honey today. Especially the fact that it is rich in B, C and K vitamins reveals the various

effects of this honey. In addition to body health, it is thought to be beneficial for hair, skin and eye health. Therefore, there is a great demand for the product today.

# 05. POLLEN

## Why Toros Dağı Pollen?

Each color in the pollen represents a flower. While ordinary pollen has 4-5 colors Our bee pollen, which we brought from Mersin-Egricayir plateau, has more than 20 colors.

## Benefits of Bee Pollen

Pollen contains vitamins A, B1, B2, B3, B4, B5, B6, B7, B8, B9, B12, C, D, E, H and P, enzymes, natural hormones and 22 kinds of amino acids, which are of great importance for the human body. acid is present.
